

SpotOn Color™

SpotOn Color is constantly improving with New Features and Capabilities

Version 1.0

Learn more about **SpotOn Color**, a proven color management platform for the pressroom and other areas of production. Initially designed with press operators in mind, this solution is simple to implement and use, yet comprehensive in function. This powerful tool can be used for job management, production setup, process control, and overall job and color assessments all wrapped in a easy to interpret interface. The newest version of SpotOn Color improves how multiple seats can be connected via the preferred corporate database management.

New Features and Capabilities

- NEW** - SpotOn Color iPhone app
- NEW** - SpotOn Flexo migration options to Import Standards and customize Metadata Mapping
- NEW** - SQLExpress installer to simplify the database configuration for connecting multiple SpotOn Color workstations
- NEW** - Function to export Customer Libraries from SpotOn Color so standards can be shared with other color management software
- NEW** - Function to export SpotOn Color job files to share with other SpotOn Color locations, the iPhone app, and to assist with troubleshooting
- EXPANDED** - Metadata Field customization to include options to create preset dropdown lists
- ENHANCED** - SpotCheck feature for offline color measurement tracking, such as ink room and prepress measurements
- UPDATED** - Device options that include the new Techkon Myiro

If you'd like to book a Demo to see the latest updates, please contact your APR Technical Rep, call **630.784.3100** or **1.800.445.4017**, or email spotoncolor@teamflexo.com

NOTE: Additional functionality and features are continuously being considered. Future upgrades will include substrate opacity measurement and tracking, support for spherical measurement devices, MIS connectivity, more open data exchange with other software solutions, score carding, and new reports and performance trackers.

* Notice: The X-Rite i1Pro is now restricted from use in the **pressroom** by X-Rite. APR has secured a 12-month grace period (through December 31, 2021) for any customers that migrate to the new SpotOn Color to change over their devices to one that is supported for the pressroom (currently the X-Rite eXact, X-Rite Ci64, Techkon SpectroDens, or Konica-Minolta MYIRO-1).
